

## ShowerChannel

**ShowerChannel** bodies and grates are manufactured from grade 304 stainless steel and comprise a fully welded, integrated outlet. Channels and grates are electropolished, creating a shiny defect-free surface, minimising cleaning and maintenance for a high class finish. The textured appearance of the grate is still visible after electropolishing and helps reduce the appearance of finger prints and soap residue.

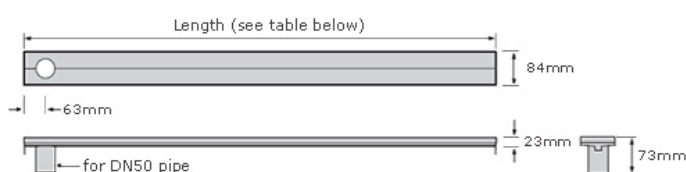

Available in six standard lengths (700, 800, 900, 1000, 1200 and 1400mm), with the option of a centre or end outlet for versatility in individual applications. A choice of eight award winning grating designs are available and are easily replaced for a new look.

The advantage of a linear grate and body is that it can be located anywhere within the shower area and only requires simple 2D grading of the floor towards the channel.
